Working in 3D

2 of 3

Realistic Render

Realistic Render

Fund selection: click on background you want, you will find different types of environments, adding exterior light and landscape to project

Choose the part of the day: morning, afternoon or night

Choose the solar bent

Click on the sun and move the cursor around the room to set the direction of sunlight to your project

Stereo Render

STEREO (3D) GLASSES

If you have the necessary equipment, you can view photos in 3D like in the cinema.

If you have the drivers for JPS format and has a monitor, graphics card and glasses compatibles with this format you can generate stereo perspective and see the result in stereoscopic image..
